

## **ABSTRACT**

The use of mobile devices such as, smartphone or tablets have increased significantly in the past decade. All these devices use applications that are created for them. There are a number of applications in Android store for Recipes Search but none of them support interface for searching, saving, and sharing recipes all at once. Recipes App is an Android application with image based UI for creating recipes. This app provides flexibility to user to search recipes. This is very handy application, which every user can search for recipes. This app is time saver providing recipes in few clicks. Recipes app makes finding recipes easy. The project has been implemented using Java and Android.
